SUAVINA
IN ITS
EARLY LIFE
VICENTE
CALDUCH

A beginning that would make **history**.

It all began in 1880, on the shores of the Mediterranean, when Vicente Calduch Solsona opened his pharmacy in Villarreal (Castellón) and began to prepare master formulas. At that time, Villarreal was a town surrounded by extensive orange groves and mainly dedicated to agriculture.

The cold and harsh working conditions caused extreme dryness on the lips and noses of the fruit pickers. Cracks and small wounds that affected and made many daily actions painful such as drinking, eating, smiling or kissing. The young pharmacist Calduch, worried about this disease that affected his countrymen so much, that he dedicated himself to investigating in search of a remedy.

At last, in his pharmacy, he managed to create an effective ointment that quickly became popular in the region. The neighbors of all the localities nearby, came to buy it and called it “Ungüent de Vila-real”. In 1916, after years of great acceptance, it was renamed **Dermo-Suavina**.

History of five generations.

The history of Suavina is the story of five generations of pharmacists that Vicente Calduch started and who were given the definitive impulse by his four children, all pharmacists, who at the beginning of the S-XX expanded the family business by opening pharmacies in Castellón, Almazora and Barcelona. Among them Manuel, who would become a renowned botanist, and José, who became popular as the founder and first president of the Villarreal Football Club.

Today, the fifth generation of pharmacists who run the current Calduch Laboratories in Castellón, continues to manufacture the Original lip balm with the same master formula as always, according to its composition from 1880, a blend of essential oils and menthol in a mineral wax base.

Vicente Calduch
Solsona

Pharmacy Calduch 1930. Villarreal.

The **Dermo-Suavina** packaging has evolved during his 140 years. This iconic image has transcended from the small local sphere, which gave it its origin, to being recognized in the rest of Spain and currently in international markets.
